CANS CERTIFICATION TRAINING

Training Description:
This one-day session provides an overview of the Transformational Collaborative Outcomes Management (TCOM) and the team certification coaching to help participants certify in the use of the CANS. We will explore TCOM key concepts, its multilevel approach and use mock vignettes and small group activities to preapte for team certification in the CANS. Participants will ahve opportunity in the afternoon to certify in a supportive live testing lab.

Learning Goals:
- Describe Transformation Collaborative Outcomes Management (TCOM) and its use.
- Describe CANS and its purpose.
- Define the role of structured assessments in the behavioral health system.
- Prepare for the on-line certification test.

Learning Objectives:
- Articulate how TCOM guides the development of a shared vision for children, families, providers, and systems.
- Identify the linkage between the assessment and the treatment planning process using the CANS.
- Understand how the CANS can be used to support system of care philosophy through identifying a shared vision for providers.
- Understand the CANS domains and items and practice using the action levels through mock vignettes.

Training Format and Options:
This virtual training can be delivered in two flexible formats to meet your team's needs:
- Condensed Version (5 Hours): Focuses on core concepts, didactic learning, and interactive discussion.
- Standard Version with Supportive Testing (7 Hours): Includes everything in the standard session, plus a 2-hour hands-on assessment lab.

About the Supportive Testing Lab: Participants work through assessments in breakout rooms with direct access to CANS trainers. While trainers will not provide direct answers, they will be available in real time to act as thought partners, offer guidance, and support real-world application.
